

# Our vision and principles

We develop children's natural curiosity and their sense of awe and wonder

We use practical and hands on activities where ever possible.

We use scientific knowledge and vocabulary

We make links and connections to our home life, other parts of our curriculum and the wider world.

We encourage children to ask and answer questions and make independent choices.

We study a diverse range of scientists who have shaped our world and who inspire us.

Creating Scientists  
Of The Future

# Our vision and principles

We are curious  
and we enjoy  
celebrating our  
wonderful  
world.

We discover by using  
our senses, trying and  
doing.

We use what we  
know about science  
and science words to  
think about and  
explain our learning

We use what  
we know about  
life and other  
things we are  
learning to help  
us understand  
science.

We ask questions,  
we give answers  
and we make  
choices.

We study lots of  
different people who  
have made a big  
difference to our world  
by using their science  
knowledge.

We are Scientists  
Of The Future
